

Corporate Overview

NEXTracker, a Flex company, delivers market-leading smart solar PV and storage system solutions to customers accelerating the clean energy transformation worldwide.

Bankability and Security

NEXTracker benefits from the financial backing of parent company, Flex, an investment grade \$24 billion company with facilities in every major region and a global supply chain network. NEXTracker also leverages Flex's SmartNexus IoT platform to provide cybersecure data connections between NX Horizon™ trackers, storage systems and the cloud to our customers.

Leadership and Industry Engagement

Led by company founder and CEO Dan Shugar, NEXTracker's executive and managerial teams have decades of experience designing, building, selling and operating solar and storage components, systems and power plants around the world. NEXTracker embraces its industry leadership role, participating in trade groups, policy activities and corporate social responsibility programs in its major markets.

NEXT-level Facts

**\$26
Billion**

Part of parent company Flex with \$26B annual revenue, \$13B balance sheet, investment grade credit rating

**30+
GW**

of trackers installed or under contract, including DG and commercial projects

**500
MW**

per week global manufacturing capacity

Industry-leading performance (UL 2703 & UL 3703-listed) and quality through partnerships with ISO 9001 suppliers

Market leadership in U.S., Latin America, India, Australia, Middle East, Africa and Europe

Leveraging Flex's robust global supply chain network in 30+ countries

Lowest LCOE and LCOS

Collection and analysis of gigabytes of actionable data daily

"Since day one, we have focused on incorporating customer feedback into our design and innovating with new features to increase profitability for system owners and EPCs. With solar now reaching parity with fossil fuel energy generation, we're finally integrating renewables on mass scale – in both mature and emerging markets alike. In my 30 years of solar, I'm more excited than ever."

– Dan Shugar, CEO, NEXTracker

A History of Innovation - Imagine What's NEXT

Named by GTM Research as the number-one global solar tracker company for three consecutive years, NEXTracker also offers an integrated energy storage platform, NX Flow™, as well as advanced data analytics capabilities and comprehensive global services.

NEXTracker Product and Service Ecosystem

TRUECAPTURE™

Smart control system increases output of NX trackers by up to 6% via advanced machine learning technology.

SOLAR TRACKER PORTFOLIO

NX HORIZON™ & NX GEMINI™

Industry's most advanced smart solar tracker portfolio, optimized for range of tier one modules including monofacial, bifacial and FSLR S6.

ENERGY STORAGE

NX FLOW™

Integrated vanadium redox flow battery + DC-coupled storage inverter solution, UL 9540A

NX DATA & MONITORING CONTROL SERVICES

Suite of advanced data and software-driven digital services available for both tracker and storage systems to dramatically improve asset management efficiency and lower operating costs.

NX delivers Villanueva Solar Plant in Mexico, largest solar project in Americas, and serves

Global Footprint: Offices and Manufacturing

Global Partners

We partner with top developers, contractors and asset owners in the global renewable energy industry.

“NEXTracker’s high-quality components and solid financial backing by Flex are important aspects of our solar strategy. NX Horizon’s balanced design and robust wind capability are ideal for our environmental and soil conditions, and will help maximize energy yield and cost savings.”

– Jayant Parimal, CEO, Adani Green Energy
